

EBS/ABS Sensor Tester for HGV/Buses/Trailers

- An easy to use device which will confirm each EBS/ABS sensor is operational & effective
- By connecting to the sensor socket on each wheel, individual sensor faults can easily be identified
- Tests for the six main causes of EBS/ABS faults
- Quick, accurate & simple to use
- Performs a complete test cycle in just 15 seconds
- Reduces down time for sensor related problems by up to 80%
- The unit also tests the exciter ring and the distance between the ring & sensor
- Product kit contents:
Control unit; 1.6m high spec sensor connector cable; Adaptor cable with crocodile clips for non-standard EBS plugs; 9V battery (included); Supplied in watertight carry case, for use in outdoor environments; Designed and manufactured in the U.K.
